

batman-adv - Bug #148

interface usage_count = 1 while trying to deactivate the hard interface.

Description

When I try to remove the module of my wifi device (it is the primary_if for bat0), modprobe hangs and dmesg shows this message:

```
unregister_netdevice: waiting for wlan0 to become free. Usage count = 1
```

Steps to reproduce it:

- insmod batman-adv
- insmod device_driver
- batctl if add wlan0
- ifconfig wlan0 up
- ifconfig bat0 up
- modprobe -r device_driver

At this point the modprobe hangs. In another terminal I tried to do
modprobe -r batman-adv
and everything went fine here.

History

#1 - 05/11/2011 12:25 AM - Antonio Quartulli

I'm using the master branch:
commit 4d4cd85635fd91cf48664c9770860012f6393

#2 - 05/15/2011 11:44 AM - Anonymous

- % Done changed from 0 to 100
- Priority changed from Normal to High
- Assignee set to Marek Lindner

It was fixed in commit:d18e485761814e3edb34d32dbc358a6c2f59b0ce

#3 - 05/23/2011 10:20 PM - Anonymous

- Status changed from New to Resolved

#4 - 05/29/2011 09:45 PM - Anonymous

- Status changed from Resolved to Closed

#5 - 02/11/2017 09:30 AM - Sven Eckelmann

- Target version set to 2011.3.0
