

batman-adv - Bug #198

3.17 hlist_add_after renamed

10/13/2014 06:03 PM - Sean Greenslade

Status:	Closed	Start date:	10/13/2014
Priority:	Normal	Due date:	
Assignee:	Marek Lindner	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	2014.4.0		
Description			
It appears that in kernel 3.17, the function hlist_add_after has been renamed to hlist_add_behind. This causes the build to die on fragmentation.c until the function name is corrected (line 188).			

History

Found commit: <https://git.kernel.org/cgit/linux/kernel/git/torvalds/linux.git/commit/?id=0f9859ca92c9182bcb8f18c55cae1a04627cbb59>

#2 - 10/17/2014 01:59 PM - Antonio Quartulli

- Assignee set to Marek Lindner

Thanks for reporting this. Actually the batman-adv code has been properly fixed for what concerns the in-kernel version, but our out-of-the-tree package does not have that change yet.

It should be merged soon.

#3 - 02/18/2015 12:11 PM - Marek Lindner

- Status changed from New to Closed

Compat code has been merged.

#4 - 02/11/2017 08:53 AM - Sven Eckelmann

- Target version set to 2014.4.0
